Objective: To familiarize student with the procedure of a typical valve adjustment on a vehicle with solid lifters or followers.

Procedure: Document vehicle. Record procedures as described below. Student must be time efficient in all activities and must not exceed 2 times flat rate. Repair quality must be at an acceptable industry standard.

Vehicle: ____________________________________________________

☐ List valve adjustment specs for vehicle.

☐ Perform valve adjustment as per manufacture and record any valves that required major adjustment.

☐ List a common problem that can occur if valves are not adjusted periodically on this vehicle.
